

Luminesa

Glow-in-the-Dark Fiber Innovation

Technology Overview

Luminesa is a luminescent fiber technology that integrates photoluminescent properties directly into the fiber structure, delivering lasting glow-in-the-dark performance without surface coatings or treatments.

Engineered for durability and consistency, Luminesa maintains its luminescent properties through repeated washing, wear, and environmental exposure.

Key Features

- Integrated photoluminescent technology
- Wash-durable luminescence
- No surface coatings required
- Consistent glow performance

Applications

- Safety and visibility textiles
- Performance sportswear
- Fashion and lifestyle products
- Specialty industrial fabrics
